(54) Title: HANDLING SYSTEM FOR RECYCLING OF PACKAGES

(57) Abstract: The present invention relates to a handling device for returnable packagings comprising a feeding device (A), having at least one inlet feed opening (16), a detection means (3) arranged in connection with said feeding device (A), for detection of at least one property of a returnable packaging present in the feeding device (A), in order to control/affect the operation in at least one subsequent unit (D; E), wherein a lock unit (B) is arranged before said subsequent unit (D; E), which lock unit (B) comprises a first (1) and a second (2) stop means, arranged to control that only one returnable packaging at a time is present at said second stop means (2). The invention also relates to a method for handling returnable packagings.
